CLASSES

» CARDIO KICK

A total body workout that combines martial arts techniques with fast-paced cardio, punching, and kicking moves. This high-energy workout will challenge the beginner and elite athlete alike. This class does NOT use boxing gloves or bags. All kicks and punches are thrown in the air.

» GENTLE YOGA

This relaxing style of yoga is a great practice for everyone and anyone. It is a low impact class that will deepen flexibility, help with balance, & strengthen muscles to protect your joints. Most of the practice will be done using the support of a chair from a seated position. This is a great class if you have an injury or are recovering from one. You will gain all of the benefits of a traditional yoga practice such as improved range of motion, muscle tone, better breathing habits, reduction of stress, mind-body connection, better sleep, and a greater sense of well-being.

» HIIT TRX TRAINING

Are you ready to get in the best shape of your life with High Intensity Interval Training (HIIT)? HIIT TRX is our newest class and incorporates TRX strength with HIIT. It's a cardio-intensive class that incorporates plyometric drills, kettlebells, dumbbells with intervals of TRX power, resistance and core training.

» TRX TRAINING

TRX is a suspension training device that uses body weight exercises to develop strength, balance, flexibility as well as joint and muscular stability.

» TYE4 PILATES

TYE4 Pilates is a total body workout that uses a unique wearable resistance/assistance harness that functions as a Reformer machine. This bungee system can be used on the mat, standing, and even in a chair. Beginners will use the TYE4 to assist the movements, while advanced participants will apply it for resistance. This class consists of TYE4 Mat and Standing Pilates, which will improve body positioning and muscle awareness, strength, stamina and balance. This class will leave you feeling stronger, balanced with better body alignment and posture.

» YOGA THERAPY

Therapeutic Yoga offers a slow, gentle, and intentional approach to postures. Class begins with a focus on connecting to the breath and transitions into connecting the breath with movement. A Therapeutic Deep Stretch class will reduce aches and pains, prevent injuries, enhance athletic performance, increase flexibility and relieve tension.
